

TRANQUIL

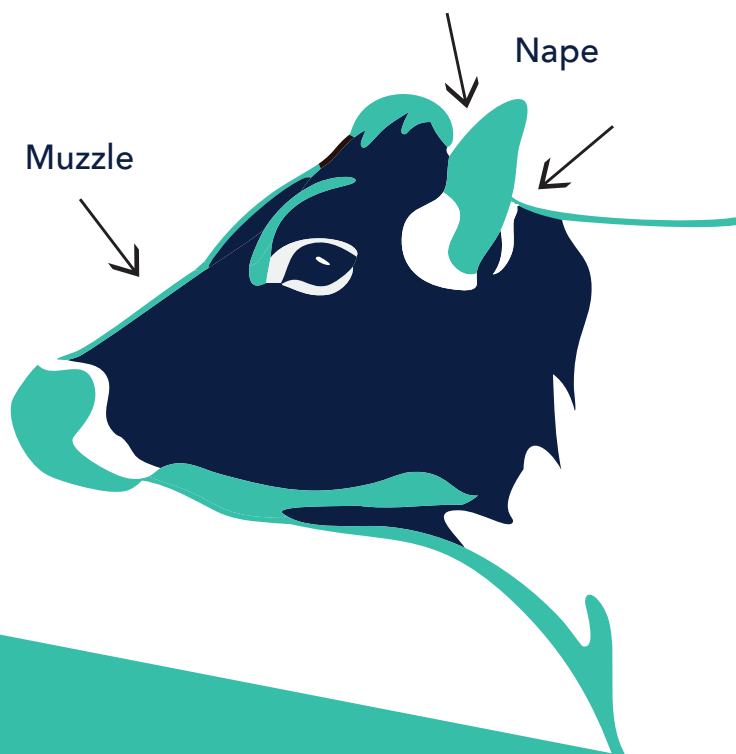

Mammal Appeasing Pheromone Analogue

Appeasing pheromones are naturally produced by lactating mammals. Used topically or applied to the environment of mammals for olfactory enrichment.

Tranquil is an all-natural, long-lasting, drug-free aromatic blend of ingredients that mimics the natural nursing pheromones of mammals and can be used as an olfactory enrichment in livestock.

Apply Analogue:

- (1) Topically to the Muzzle and Nape of an animal
- (2) Directly onto the Environment of the animal for olfactory enrichment.

A maternal pheromone is a chemical signal that a lactating mammal releases to communicate with her young

ACTIVE INGREDIENT:

Mammal Appeasing Pheromone Analogue (15%).....150 mg/mL

DIRECTIONS FOR USE

DO NOT inject or administer orally.
Apply for aromatic use, olfactory enrichment.

Topical Use:

- Apply dose equally above the muzzle and on the nape of the neck.

Animals less than 350 pounds:

Apply a total of 5 mL of Tranquil

Animals greater than 350 pounds:

Apply a total of 10 mL of Tranquil

Environmental Use:

- Dilute 1:10 with warm water. Shake well and apply on surfaces near feeders and water troughs.
- Apply approximately 1/2 gallon of diluted analogue per 100 animals.
- Repeat every other day as needed.

PACKAGING & STORAGE

Available in:

- 300 mL Bottle (#7001)
- 1900 mL Jug (#7002)
- 5 gallon Jug (#7003)
- 1 gallon Jug - Diluted (#7004)

Store at room temperature 50 - 85°F (10 - 30°C). Avoid prolonged contact with direct sunlight. Do not refrigerate or freeze.

REGULATION:

Tranquil is not a drug, pharmaceutical, or vaccine and therefore is not regulated by the FDA. All ingredients are generally regarded as safe (GRAS) and there is no milk or meat withdrawal. If an animal has an adverse reaction, immediately discontinue use and seek consultation of a veterinarian.
